Rector.

"Generally debilitated for years.
Had sick headaches, lacked ambition,
was worn-out and all run-down. Bur-
lock Blood Bitters made me a well
woman."—Mrs Chas. Freitoy, Moosup,
Conn.

JACKSON CITY ITEMS

Local Happenings About Amador's County Seat

Attorney Robert C. Bole, who has
been confined to his home on north
Main street for the past several
weeks, suffering from an attack of ty-
phoid fever, made his first appearance
down town on Wednesday.

George Huberty left for San Fran-
cisco on Sunday last, returning on
Tuesday, with his wife and daughter
Veryl, who has been under treatment
in the Children's Hospital in San
Francisco.

Give your former Jackson friend a
year's subscription to the Ledger. It
will make a fine Christmas present.

Miss Roma Spagnoli, who had been
visiting relatives in Elk Grove and
Sacramento for the past week, has
returned to her home in this city.

J. F. Wilson, Dentist. Hours 9 a.
m. to 5 p. m. Phone—Office, Main
75; residence, black 394; Jackson.

The cost per patient at the Cala-
veras county hospital for the month of
November was \$13.22, including salaries
of officials and everything.

Mushrooms were very plentiful
around Jackson the early part of the
week, owing to the warm rains the
latter part of last week. Scores were
roaming over the hills Sunday in quest
of the delicious fungus.

Leon Schwartz, who has been attend-
ing St. Mary's college, in Oakland, is
home for a vacation.
Miss Eva Deletis, who has been at-
tending school in Sacramento, returned
home in the early part of the week to
spend the holidays with her folks.

You are well posted on County news
when you read the Ledger
Sheriff-elect, John S. Davis will
move into his recently purchased resi-
dence at the corner of Court and
Church streets, in a few days. The
place was owned by M. Newman, and
is conveniently situated for the sheriff
residence. The Green family who were
occupying the place have moved into
the Hoffman place on the Sutter Creek
road.

Stephen Angove passed the 60th
milestone of his life last Sunday, and
in his usual manner liberally treated
all his friends and acquaintances on
the occasion, by serving cake and
wine to all who wandered into his place
of business on Main street.

Clarence Bradshaw, who is to be
deputy sheriff under the incoming ad-
ministration, was in Jackson the latter
part of last week, looking for a resi-
dence for himself and family. We are
informed he has secured the dwelling
house of J. Going on Pitt street.

Change of Stage Line.

Owing to change on the main line
between Sacramento and San Fran-
cisco, the stage from Jackson to Mar-
tell leaves one half hour earlier than
formerly. It leaves at twenty minutes
to eight every morning, instead of ten
minutes past eight. This change is
necessary in order to make connection
with the west bound train at Galt.
There is no change in the arrival of
the stage in the evening.

Bazaar a Success

The bazaar given in the Odd Fellows
hall by the Ladies Guild of St. Augus-
tine's Episcopal church of Jackson,
on Thursday evening last, was well
patronized and entirely satisfactory to
those who carried out the affair.

Handkerchiefs, fancy and useful ar-
ticles were sold, as well as candy and
delicatessens. Refreshments, sand-
wiches, cake, coffee, tea and choco-
late were disposed of by the ladies in
charge at a rate that indicated both
hunger and satisfaction on the part of
the patrons. The proceeds of the bazaar
will go towards helping defray the
expense of painting the church, and
making other necessary repairs to the
structure.

Ladies Aid Society

The Ladies Aid Society of the M. E.
church, will have the usual confec-
tionery, cakes, pies, etc., for sale at
the office of George W. Brown, on
Main street, on Saturday afternoon.

BURIED ALIVE IN SOUTH EUREKA

A Miner Loses his Life in A Singular Manner.

Early Sunday morning a miner,
whose name is given as Luigi Crovara
met his death in a peculiar manner
while working in the South Eureka
mine. He was employed in taking
waste rock from a chute running from
the 2200 to the 2300 level for filling up
abandoned drifts. As is often the case,
the mouth of the chute became choked,
so that material refused to flow
through the opening. At intervals
along the sides of the chute openings
are left for such an emergency, and
by climbing up the manway and pry-
ing with a crowbar at the place of ob-
struction the difficulty is overcome.

On this occasion, however, the miner
got into the chute, with his crowbar,
and commenced prying the rock loose.
This was a most dangerous course, and
it seems strange that any employee
would voluntarily assume such a risk.

As soon as the rock was loosened,
the pressure from above was such that
it came down with a rush, before the
victim had a chance to get out of the
way. He was completely buried under
the debris of slush and rock, and liter-
ally buried alive.

A fellow workmen near by noticed
that Crovara was missing, and sus-
pected that something was wrong.
Assistance was had, and a number
were put to work in the chute to re-
scue the victim from his sudden tomb.
His lifeless body was soon found with
the crowbar close by. The body was
badly mangled by the weight of the
falling debris. The remains were
taken to the surface and afterwards
removed to undertaking parlors at
Sutter Creek.

Deceased was a young man about 24
years of age, and a native of Italy.
He had been working in the South
Eureka about three months, and be-
fore that was employed for a while at
the Fremont mine. He was a single
man.

Coroner Potter held an inquest over
the remains on Sunday afternoon, the
jury rendering a verdict of accidental
death. The funeral services were held
Monday afternoon, the remains being
interred in the Catholic cemetery of
Sutter Creek.

Perano-Dufrene Nuptials

A pretty home wedding was solem-
nized at the home of Mr and Mrs Wm.
D. Dufrene, No 42 Main street, on
Wednesday at high noon, at which
Rev. J. O. Duncan of the Methodist
church officiated.

The contracting parties were Miss
Winnie Dufrene, and Julius M. Perano,
both well-known and highly respected
citizens of Jackson.

The bride was attended by Miss Eva
Perano, sister of the groom, and
Joseph Raggio acted as best man.

The bride wore a white messaline
silk ribbons and lace dress with kid
ties to match. She wore a wreath of
orange blossoms in her hair, and car-
ried a bouquet of white carnations.
The bridesmaid was handsomely
gowned in a dress of blue missaline
silk.

The parlor was decorated so as to
form a huge wedding bell of white,
tastefully blended with maiden hair,
ferns, and white carnations. The
dining room was decorated in blue
with pink and white geraniums. The
happy couple were the recipients of
many costly and beautiful presents.

After the ceremony had concluded,
the many friends who had been invited
to attend the wedding were escorted
to the dining room, where a sumptuous
dinner awaited them. The wedding
cake was a marvel of beauty, and was
distributed to friends and acquaint-
ances all over the county.

A home elaborately furnished, ad-
joining property of the father of the
bride, will be occupied by the newly
weds as their permanent residence.
Mr and Mrs Perano left on Wednesday
afternoon for a honeymoon trip, which
will include a visit to many of the
coast cities.

Unclaimed Letters.

Unclaimed letters remaining in the
Jackson post office December 16, 1910:
Giovanni Babbini, H. S. Cobb, J.
A. Cook, Miss Lillie Hill, Miss May
Triliter, Wm. J. Prisk.

MURDER CASE IS BEING TRIED

Drytown Crime Is Heard In Superior Court

The murder case of Giacomo Sampo,
was opened in the superior court
room on Monday morning.

The firm of Spagnoli & Spagnoli re-
presented the defendant. The prisoner
is charged with the murder of Stefano
Fistori, which occurred on the night of
November 25th in Drytown.

The prisoner sat beside his young
wife, in the dock, the latter with a
baby girl, not a year old. He appeared
indifferent to any of the questions
asked by the attorneys who were try-
ing to select the jury.

Sampo seemed the most unconcerned
man in the courtroom, when the dis-
trict attorney asked each jurymen if
he had any scruples as to the infliction
of the penalty of death.

At six o'clock on Monday evening,
only two jurors had taken the oath in
the panel box, and Judge Woods, after
admonishing his jurymen as to their
conduct, while at recess, ordered that
they appear again at 7 o'clock. The
defendant's counsel, Ernest Spagnoli
informed the court that if a contin-
uous night session was to be held
throughout the trial, he desired to
enter an objection.

The judge thereupon stated that it
does not make any difference whether
you object or not. This county is
under a heavy expense in holding all
these jurymen here, and shall order a
night session until the selection of
the jury is completed.

Yesterday morning, with eleven
jurors sworn, and the twelfth passed
by attorneys on both sides, a request
was made by the defense to allow an
extra preemptory challenge to be ex-
ercised on any one of the already
sworn jurymen. It was requested that
the court exclude all jurymen for a
period of five minutes to allow defense
to present certain facts which they
did not wish the jurymen to hear, as it
might harm defendant's cause. A
recess was declared and the court in-
formed the attorneys for the defense
that if anything had come to their
knowledge that was detrimental to
their client, concerning any individual
jurymen, he would hear the complaint
privately. The defense exercised the
extra challenge and removed Wm.
Green, who was the last to be ex-
amined. James Mushett was then
selected, and completed the panel.

The jury of twelve impartial men
was completed Thursday noon. After
examining 70 talesmen—fifty on the
regular venire and two special venires
of ten each. A number of those ex-
amined were unable to qualify on ac-
count of having conscientious scruples
against the death penalty.

Following is the list of men selected
to try the case:

J. W. Jones, Virgil Norton, Edward
Shealor, R. O. McKean, Thos. J.
Burrows jr., Eric Schmidt, J. H.
Griffin, W. H. Taylor, J. L. Cox, L.
A. White, H. C. Hamrick, James
Mushett.

Thursday afternoon the taking of
testimony was commenced. Miss Eva
Cavallero, a prepossessing and remark-
ably bright and intelligent girl of 15
summers, testified; I live in Drytown
with my parents, who keep a boarding
house, I am acquainted with defend-
ants, also acquainted with the de-
ceased, Stefano Pistoni. Saw de-
fendant, Giacomo Sampo and his
brother George at the boarding house
that evening, also the co defendant
Stefano Conti. They were not board-
ers, but took supper there that even-
ing. Deceased Pistoni was a boarder
and ate supper at the same time. I
went for the mail and returned about
eight, returning in about twenty
minutes. The parties were there in
the kitchen when I got back; they
were chatting among themselves
about their work. After a while they
started dancing, with an accordion as
music. I danced with the two Samps,
with Conti and Pistoni. The trouble
commenced while dancing with Pist-
oni. George Sampo came and called
bad names, and struck at Pistoni.
Deceased said he did not want to fight,
and quit dancing and went out by the
back door. George Sampo and Conti
went out by the front door five or ten
minutes afterwards; defendant stayed
in the house. About half an hour
George returned, and said, "Come on
brother, we might as well kill him
now, we are not scared." Saw Pist-
oni in bed afterward about 12 o'clock.
He seemed to be asleep. Knew of his

MINE NEWS ALONG LODGE

Interesting Accounts of Mines Located In Amador Co.

Plymouth District

Mining around Plymouth continues
to look bright for another period of
prosperity for this once famous mining
town. The Alpine Company is pushing
ahead with the development of that
property. Some drawbacks have been
experienced with the electric machi-
nery, causing the transformer to
break down two or three times. An-
other and more powerful machine has
been installed, which was expected to
be in running order early this week.
The company is supplied with power
from the American River company.

There are persistent rumors that the
old Plymouth Consolidated mines are
to be reopened. Mr Lane, who is in-
terested in this property, has been in
Plymouth recently, looking into the
proposition. The residence of the
superintendent, which has been out of
commission for many years, has been
repaired and put in condition for oc-
cupation, and other improvements
have been made, which points to the
resumption of mining in the near
future. The mine was abandoned
some twenty-five years ago. It was
worked to a depth of about 1500 feet,
which in those days was considered
deep mining, and the impression was
general that the gold bearing ores
were not likely to continue much be-
low that depth. After the fire which
ragged in underground works for weeks,
and caused the shafts to be closed air-
tight to extinguish the flames, the
mine was reopened, and considerable
prospecting was done. But the prop-
erty never got on a paying basis, and
after a few months of fruitless pros-
pecting the mine was closed down for
good by the then management. All
sorts of reports have gained currency
as to the cause of the shut-down—that
good ore existed in the lower levels at
the time, and so forth. At one time
the eighty stamp mill of this mine
was yielding at the rate of from \$75-
000 to \$100,000 per month. While it
is unreasonable to think that pay ore
was left in the levels in any quantity
at the time of the closure, there is
every reason to believe from the his-
tory of deep mining in Amador county
since the Plymouth Consolidated
ceased operations that this mine will
respond in gold production to further
judicious development work.

Amador Limerock Company

From eight to ten men have been
employed for several months in open-
ing up the big lime deposit of this
company at Mount Echo. They have
exposed a face of over 100 feet of
backs and several hundred feet in
width. It has been developed to a
point to demonstrate that this is one
of the heaviest deposits of limestone
in California. What is more remark-
able is that the rock is very uniform
in quality, and unusually free from
deleterious matter. It is estimated
that there are over one million tons in
the deposit from present indications.
It is expected that steps will be taken
by the company shortly looking to the
marketing of the material. Transpor-
tation facilities to the Amador branch
railroad have to be provided, and this
will involve either the construction of
a railroad from a point on the Amador
branch a mile or two below Lone to the
quarry, a distance of four or five
miles, or an aerial tramway to the
railroad depot.

South Eureka.

Fixing the shaft is proceeding at a
satisfactory gait. It is thought that
this work will be completed sufficient-
ly to enable the mill to be started, if
not the first of the year, at least by
the middle of next month. It will be
one of the best equipped mines in the
state when again in operation and the
vast store of pay-rock blocked out
insures dividends for many years to
come. The stock has held up well dur-
ing the idleness of the mill for the
past three or four months. It is held
at \$6.50 per share. The company has
continued the three cents per month
dividends during the shaft repairing
out of the surplus.

Bunker Hill

The clean-up for the month of No-
vember showed a slight falling off as
compared with the previous month,
the yield of gold amounting to some-
thing over \$16,000. The falling off is
owing to the large quantity of low
grade ore that was sent to the mill

from the 1950 level, and that had to
be got out of the way, the easiest and
most economical way to dispose of it
being to send it to the mill. The re-
duced yield for the month does not
mean any decline in the average grade
of rock. The 1950 level is opening up
fine. In places the ore body is 60 to 80
feet wide, portion of it of course low
grade, but the bulk of it good milling
quality. The addition to the mill of
twenty stamps is making satisfactory
headway, and it is expected to have
forty stamps running inside of two
months.

First Clean Up

Jos. Phelps and T. J. Burrows have
been operating a small quartz claim on
the ground of the Oneida company.
They have secured a lease of the
ground, and have discovered a rich ore
streak, which is said to assay in the
neighborhood of \$30 per ton. A one
stamp mill has been working on the
ore, with what result we are unable
to state. Some difficulty has been ex-
perienced in saving the gold. For
some reason the gold does not amal-
gamate freely, involving considerable
loss of the precious metal. This
trouble will probably be overcome.
The owners are hopeful of reaping a
substantial profit out of this enter-
prise.

Concert for Sunday

The Jackson band concert will be
held on Sunday afternoon at 2:30 p. m.
from the balcony of the Globe hotel.
The program is a selection of composi-
tions by recognized authors, and it is
safe to say that the local organization
will render each selection in a credit-
able manner. Following is the pro-
gram to be played:

1. "Thundercloud," March,
T. H. Losey
2. "State Militia Review,"
Geo. Koppitz
3. "Sextette," From, "Lucia di
Lammermoor," Donizetti
4. "Southern Roses," Waltz,
John Strauss
5. "Dill Pickles," Rag,
Chas L. Johnson
6. "Schuberts," Serenade,
Franz Schubert
7. Select, From, "Il Traviatore,"
G. Verdi
8. "The Invincible Eagle,"
Souza

New Rector for City

Rev. W. P. Kashevaroff, who has
been assigned to the Jackson parish
as rector of St. Sabbass Greek ortho-
dox church, is reported as being well
pleased with his new charge, which
also includes Angels Camp.

The clergyman comes here from
Sitka, Alaska, where he had been do-
ing missionary work for a number of
years. Services will be held in the
Jackson church every first and third
Sunday in the month.

Dr. Franklin Ill

Dr. Blake Franklin will leave for
San Francisco to-morrow morning,
where he will undergo an operation
and have his tonsils removed. Dr.
Franklin has been confined to his bed
at his residence in this city since Tues-
day last, suffering from tonsillitis
and bronchitis. Arrangements have been
made with the local doctors to take
care of his patients during his absence,
which will be about two weeks.

Returned to Amador Co.

After being absent from Amador
county for the period of over two
years, S. E. Robbins has returned to
his former place of employment at the
Fremont mine, as assistant superin-
tendent of that company.

Mr Robbins has followed mining for
the greater part of his life, at various
mining districts throughout this
country and many foreign countries.
His last position was with a New
York company, engaged in gold
mining at Costa Rico, Central America.
The mine under his control was one of
the largest in that country, named the
Agnacata.

Mr Robbins says that he is very
much surprised at the rate which the
mining industry has flourished along
the mother lode in Amador county in
the past few years.

FOR SALE.—A very fine sable
coat, worth \$500, will be sold at a
great sacrifice. On exhibition in Mc-
Gary's show window, on Main street,
Jackson.

HIGH SCHOOL AGAIN.

From now on, until the location of the county high school is finally settled, the people are to be bombarded with petitions and arguments in favor of one or other of the proposed locations. The decision rests first with the county board of education acting as a high school board. This board is organized and ready for business. It requires a unanimous vote of the board to permanently locate the school. Failing to agree on this point—and there is little hope for any other outcome—the board may decide upon a temporary site by a majority vote. The board is composed of five members, so that three can fix the temporary location, and refer it to the voters to determine the permanent location at a special election called for that purpose. The decision of the board as to the temporary location will be a decided advantage in the special election. We understand that each place contesting for the honor of having the high school must be prepared with the offer of a site. This is probably designed to insure a suitable site at a fair price, and not to be construed as requiring the site to be free of charge to the taxpayers who have voted for the establishment of the school. The latter interpretation seems to be entertained by not a few, but in our opinion is demoralizing and out of joint with the principles of law and justice. Among the arguments trotted out to induce the board to settle the matter finally by a unanimous vote for Sutter Creek it is urged that the county would thereby be spared the expense of a special election. The same argument might be used with equal force in behalf of any other proposed location. But the bare fact of saving the cost of a special election is worthy of no consideration whatever when opposed to the honest conviction of the board as to the most suitable place from the viewpoint of accommodation and accessibility to the greater number of likely pupils.

It is rumored that subscriptions are being solicited from individuals to influence the selection of the site by holding out a fat purse for the building and equipment of the school, thereby offering relief to the general taxpayers from the whole or part of the burden. This course might not be objectionable after the location has been settled, as a grateful appreciation of the residents of the successful locality. But to adopt this method beforehand seems to us a vicious and corrupting policy unworthy of being countenanced in any public cause, and particularly reprehensible in a high school movement.

THE PRESIDENT'S MESSAGE.

President Taft's first message to congress will [serve to] lay any apprehension in the public mind as to likelihood of any disturbance of business interests by a tendency toward extreme radicalism. He is fully abreast of the demand for a pause in the enactment of laws intended to further curb the big corporations in their activities. He recommends the enforcement of existing anti-trust laws, and ascertaining definitely the effect thereof, before proceeding to place any more laws on the statute books on this subject. He is also opposed to any attempt at a general revision of the tariff at this time, leaving modifications to be made, one schedule at a time, at the recommendation of a permanent tariff board, after an impartial and scientific investigation. The present tariff, notwithstanding the severe and in a great measure unjust criticism to which it has been subjected, has worked fairly well in practice. It has largely increased the revenues showing that was a revision downward in accordance with the declaration of the platform of the last republican national convention. At the same time there has been no serious disturbance of business on account of the changes; showing that the measure is wisely framed both from the standpoint of the consumer and manufacturer. That it may be improved upon is not doubted, but the president believes that this can be better accomplished by amendment by the tariff board than by the drafting of a new bill covering the whole field.

Another strong point is the recommendation of the practice of strict economy in all branches of the government, without impairment of efficiency. As emphasizing this matter, under the administration of the present postmaster-general a saving of fifteen million dollars has been effected in one year. And the president favors the same rigid economy applied all along the line.

All through, the message is a conservative and business-like document. It creates the impression that a statesman of the highest order is at the head of the government, under whose guiding hand all the vast interests of the nation will be zealously safeguarded.

SCIENTIFIC MISCELLANY

Reported weekly for the Ledger

Getting the Most from Our Resources
—Sand Fire-Extinguishing—Aeronautical Weather-Service—Tides for Cheap Electricity—Soil Moisture Necessary—A Phosphorescent Electric Lamp—Unaltered Sterilized Milk—A Lighted Life-Preserver.

"Efficiency" is the watchword of the hour, and it is being applied not only to the human unit, the individual specialized to fill in the most helpful manner his place in the evolving plan of Nature, but to the plant and animal attendants upon man and even to Mother Earth herself. It has been recently estimated that the nitrogen taken from the air by electrical means will add 50 per cent to the productivity of the soil. Recent years have shown that the earth's yield is to be further increased by such means as intelligent rotation of crops, the best use of nitrifying organisms, more attention to the action of sunlight and heat in preparing soil for seed and a better understanding of the disinfection of soils from the plant poisons left by growing crops. Electrification of the air above plants has been found to have great influence. Sir Oliver Lodge finds that it has always existed, and he and others are endeavoring to so intensify and adapt it artificially as to get the greatest possible results in agriculture. Even more is expected from scientific breeding. Improvements of breeds of plants and animals has become a world undertaking, and the astonishing achievements already made give promise that man's wants are to be even better supplied in future, with an increase in abundance that will provide for a great increase of the world's population.

Modern industries give liability to fire where water is not only ineffective but dangerous as an extinguisher, and the use of sand is among the substitutes. The new fire apparatus of London on electric lighting station is a truck holding 600 pounds of sand and carrying a fiber bucket and a couple of spades. This equipment is specially adapted for the purpose, and is advised for motor garages, oil stores, electric theatres, etc.

The Weather Service of Prussians, is to be supplemented by a special aeronautical service. The Aeronautical Observatory at Lindenberg, proposes making regular observation of upper air currents by captive balloon, and issuing an afternoon weather map.

Lacking water-power for developing cheap electrical energy, engineers in England are beginning to turn their attention to the tides. In a paper read the other day to the Ipswich Engineering Society. W. O. Hornsail pointed out that to make tidal power profitable now there must be available a natural pound, which should be free from use for navigation, must require only a short dam to close it to the sea, and should have a minimum tidal range of at least ten feet. Such conditions may be found along the Essex coast and similar low-lying shores with moderate tides. Some use of tide power has been made for hundreds of years, corn having been ground by it in the eleventh century, but the early method was the turning of a wheel by the current flowing back and forth in natural channel. For this inefficient plan the storage of water during the rise of the tide and its use as a considerable fall only during the outward flow has been substituted. A tide mill at Woodbridge, still regularly grinding corn, has a shallow pound of 10,000 square feet, with a tide range of 10½ to 13½ feet, and the wheel is worked with a fall of 5 feet, continuing 4½ to 5½ hours at each tide. The undershot wheel, 14 feet in diameter and 6 feet wide, develops 10 or 12 horse-power at 6 revolutions a minute. The tide mill at St. Oysth had a pound of 1,120,000 square feet and used two wheels, each 18 feet in diameter by 6 feet wide and credited with 20 horse-power.

Each kind of soil is found by A. Muntz to have a definite moisture limit, below which seeds actually dry up instead of gaining. In a sandy soil, 0.5 per cent of water is sufficient for germination; with loams the required percentage is from 2.5 to 7.0 according as the proportion of clay increases; and with garden soil, containing a large proportion of humus, nearly 19 per cent of water must be present before germination can take place.

A newly-patented British lamp is a Geissler tube, coated on the inside with phosphorescent sulphides and filled with helium or other rarefied gas. The passage of an electric current through the tube excites the phosphorescent lining, producing a brilliant and economical white light.

A solution of the problem of sterilizing milk without altering its ferments is claimed by a Russian chemist.

When the sterilization is brought about by boiling-water temperature, the milk is rendered inert by the decomposition of its albuminoid bodies and their salts, and feeding infants with such milk is regarded as the cause of many deaths. Heating even to 62 deg. C, if continued several minutes, destroys the ferments and antitoxins. It is found, however, that heating to 72 deg to 80 deg. C., will give complete sterilization in a few seconds, and that in this short time the milk itself is not altered. To effect this heating, the milk is broken up into fine globules by forcing it into a sterilized vessel by a spray of steam or compressed air. It is at once condensed, and is allowed to drop into a receiver, where it is cooled. The germ-destroying action on the sprayed drops is rapid and energetic. The air spray has no other effect whatever, but with steam spray the milk becomes diluted about 10 to 15 per cent.

An electrically lighted life-buoy has been brought out by an English firm for use in places where workers are exposed to the risk of drowning, as in dock and on ship-board. It carries two 9 candle-power electric lamps above the water and two below the surface, and in clear weather the light from these is visible to a considerable distance. The two primary batteries feeding the lamps are sealed until the buoy is lifted from its rack. This action automatically lights the lamps, and they continue illuminated for three or four hours. The weight of the buoy is but 25 pounds. In the tests made, a man of average weight was carried by the buoy while lying across, and three men kept their heads up by its means when their bodies were submerged.

Concentrating in a few central stations the burning of all coal used for electric power is the remedy of C. H. Merz for reducing London's smoke. These large stations, with tall chimneys, would effectively consume the fuel, and would give an estimated annual saving of 6,000,000 tons of coal. By using the electric current for cooking and other domestic purposes as well as lighting, smoke would be still further lessened.

Impure blood runs you down—makes you an easy victim for organic diseases. Burdock Blood Bitters purifies the blood—cures the cause—builds you up.

A Marvelous Acre

What is considered the most wonderful acre in the world is in Glenn county, and was once a tiny fraction of a great wheat field. Samuel O. Cleek bought it nearly 30 years ago. There was no water for it, but Mr Cleek put down two wells and found water enough for his acre. Every foot or that acre is in use. Here is an inventory:

Cottage and veranda, 30x30 feet; barn and corral, including two chicken houses, 75x75 feet; two windmill towers, 16x16 feet; garden, 46x96 feet; citrus nursery, 90x98 feet, containing 400 budded orange trees; a row of dewberries along the fence, 100x2 feet; four bearing apricot trees, two oak trees, six fig trees, ten locust trees, one paradise tree, four bearing bread trees, thirty rose bushes, 20 geraniums, 12 lemon trees, a lime tree, eight bearing orange trees, five pomegranate trees, six beds of violets, 6x2 feet each, one patch Japanese bamboo, one bed calla lilies, four prune trees, six cypress trees, 14 stands of bees, four huge grapevines, one bed of sage, one large garden and flower seed bed, beside honeysuckle and other rare and beautiful plants and shrubs.

This is probably the best example of what an acre can do that has ever been worked out in America. This acre has not only supported Mr and Mrs Cleek, but they have long been able to put aside several hundred dollars yearly.

The size of the acre depends upon the farmer who owns it.

Will Promote Beauty

Women desiring beauty get wonderful help from Bucklen's Arnica Salve. It banishes pimples, skin eruptions, sores and boils. It makes the skin soft and velvety. It glorifies the face. Cures sore eyes, cold sores, cracked lips, chapped hands. Best for burns, scalds, fever sores, cuts, bruises and piles. 25c at Spagnoli's drug store.

Lodge will Celebrate

Arrangements are nearly completed for holding a grand anniversary of the Amador Aerie No. 1776, F. O. E. in Jackson. The celebration will be a memorable one for the society, if the plans thus far arranged are carried out. The anniversary will be held on the 6th of February.

The greatest danger from influenza is of its resulting in pneumonia. This can be obviated by using Chamberlain's cough remedy, as it not only cures influenza, but counteracts any tendency of the disease towards pneumonia. Sold by all dealers.

Miner Meets a

Sudden Death

Word was received by Mr and Mrs Thomas J. Seymour of this city, that the brother of Mrs Seymour, a miner named Lewis, was instantly killed by a fall in a mine shaft at his place of employment in Grass Valley last week.

The unfortunate man was standing on a plank which was laid across the shaft when a fellow worker accidentally pushed the end of the plank off its supports, allowing the victim to plunge headlong into the shaft, killing him instantly.

Mr and Mrs Seymour left for the home of the deceased to attend the funeral, which was held on Monday last.

Basis of Confidence

The fact that so many promi-
nent and distinguished business
men are patrons of this bank is
not in itself perhaps a sufficient
reason for your becoming a
patron of it until you have in-
vestigated and approved the
merits of our claims to your
confidence, but it is an item of
sufficient importance to justify
you in making an examination of
our claims to merit. The basis
of successful banking is capable
management, and sound re-
sources which beget public con-
fidence. If we obtain your
patronage we want your con-
fidence to come with it.

B W Pitt on Mountain Queen and Mountain King, Pine Grove district.
Chas H Sheild on Mary Ella quartz mine, Plymouth district.

Patrons Get Notice

The Amador Electric Light and Power Company have sent out about 400 notices to patrons in Jackson the past week as follows:
Since the lighting business was started by us in this county many improvements have been made in incandescent lamps and other electrical devices, and now many people desire a brighter light than was possible with the old sixteen candle power carbon lamp and also desire to make use of the convenient electric heaters, motors, etc., which are now so generally used in the larger cities and towns.
Our old contract, made with the Blue Lakes Water Company was based on a flat rate for sixteen candle power lamps only; our rate to nearly all our customers has been a fixed rate per sixteen candle power lamp for night service only.
In order to comply with the many requests of our customers for electric current for other purposes than lighting, we are now compelled to buy all our electric current by meter measurement, and will have to sell it in the same manner; therefore, after January 1st, 1911, we will be obliged to install meters, after which time our customers will pay only for the electric current actually used, and may install any of the electrical devices they desire.

Feel languid, weak, run-down? Headache? Stomach "off"?—Just a plain case of lazy liver. Burdock blood bitters tones liver and stomach, promotes digestion, purifies the blood.

AMADOR

Dec. 15—Miss Hattie Hinkson came home to spend the Christmas holidays with her parents.

Lester Gatten is visiting his relatives in this city.

Howard Dynan returned home, after his serious illness in San Francisco.

Mrs Bonneau and daughter came down from Volcano to visit relatives in our town.

Lucile Venning was taken sick with bronchitis, and a trained nurse was immediately summoned. At last reports the patient was improving.

Mrs C. Morrow was a passenger on the outgoing stage Saturday, to be gone for a few days.

Mrs George Arnerich and daughter Nellie, have been ill for several days, but are now better.

Willie Chynoweth is on the sick list.

Mrs Bennetts and grand-daughter Florence Arthur, spent Wednesday at Sutter Creek.

Miss Elsie Dynan was a Sutter Creek visitor Wednesday.

Many persons find themselves affected with a persistent cough, after an attack of influenza. As this cough can be promptly cured by the use of Chamberlain's cough remedy, it should not be allowed to run on until it becomes troublesome. Sold by all dealers.

It is claimed that the boosters for the location of the high school in Sutter Creek have secured a formidable array of signatures. Some claim that over one half the voting population of the territory concerned have signed for that town. A number of signatures have been obtained in township one, outside of the city of Jackson. Men have been hired in this behalf to solicit signatures, and Jackson has had only the ladies of the local improvement club to look after this important duty.

The peculiar properties of Chamberlain's cough remedy have been thoroughly tested during epidemics of influenza, and when it was taken in time we have not heard of a single case of pneumonia. Sold by all dealers.

Prisoners on Parole

The report of the state board of charities will contain the following:
The number of prisoners in our prisons would have been much larger had it not been for the great increase in the number of prisoners placed on parole. On June 1st, 1908 there were 179 of our prisoners on parole, while on June 30, 1910 there were 338. There were paroled during the two years 484 while the total number of paroles granted since the enactment of the law in 1893 is only 934. While, therefore, this law has been on our statute books 17 years, 45.6 per cent of all the paroles granted have been granted in the last two years. Of the total of 627 prisoners who have been on parole at some time during the last two years, only 44 have broken their paroles and been returned to prison. A few are yet at large, but during the 17 years since the passage of the act there are only 34 parole breakers now at large. We have in our prisons a large number of recidivists, reaching as high as the 8th and 10th terms, but of the paroled men who have kept their paroles and been discharged or pardoned, we have record of only one who has again been convicted of crime.

These paroled men have also earned during the time they have been on parole \$643,822.34, and their savings from these earnings have amounted to \$150,984.33. How much better is this than keeping them in prison during their full terms, at an expense to the state of about \$180 a year for each prisoner. Had these men been kept in prison until the end of their terms, they would have cost the state an estimated amount of \$525,000.

Much as this parole system has done for the state, it can and should be improved. The statement was recently made by the efficient parole agent of our prisons, that there were then in our prisons 300 prisoners who were entitled to parole under the law, with the exception that they could not make the \$25 deposit demanded by a rule of the board of prison directors, and pay their transportation to their place of employment, or had no place of employment to which they could go. No person can make money while in prison, and no prisoner should be denied a parole who, by his good conduct, has earned one. Nor should contributions be solicited from the charitable public for this purpose, as is now being done. The state is to-day the great beneficiary from the paroling of prisoners. It saves \$180 a year on each prisoner in cost of maintenance. This saving will much more than compensate the state for the expense of the few who break their paroles and have to be returned.

PARDONS.

We desire to commend especially the practice of our governor, Hon. James N. Gillett, in the granting of pardons. He requires in nearly all cases that the prisoner first prove his worthiness on parole, and in cases where such worthiness has been proved, the pardon has been given. This is a great incentive for the prisoner to "make good," and will have a good influence in making our prisoners good citizens.

Children Cry FOR FLETCHER'S CASTORIA

Dyspepsia is our national ailment. Burdock Blood Bitters is the national cure for it. It strengthens stomach membranes, promotes flow of digestive juices, purifies the blood, builds you up.

Grand Jury

The grand jury met last Friday, and adjourned the same day, temporarily, to meet again at the call of the foreman. Committees were appointed to look into various matters. We understand that Jas Jay Wright has been employed as an expert on the books of county officers for the past 18 months at \$5 per day, with the number of days compensated limited, and to report to the jury in March next.

Baby won't suffer five minutes with croup if you apply Dr. Thomas' Eclectic Oil at once. It acts like magic.

Teachers' Examination

Office of Superintendent of Schools of Amador county.
Jackson, Cal., Nov. 26, 1910.

To Whom it may Concern:
The Board of Education of Amador county will meet in the Superintendent's Office on Saturday, December 17th, to adopt questions for the Teacher's Examination, to commence December 19th, and continue until December 23d, 1910, inclusive.

December 24th the Board will grade papers, issue certificates, grant recommendations for State Documents and adopt Library Books

Respectfully,
W. H. GREENHALGH,
Superintendent of Schools

SEMI-ANNUAL REPORT

—OF—

Public Administrator of Amador County

ENDING JUNE 30th, 1910.

To the Hon. Fred V. Wood, Judge of the Superior Court of Amador county, California.
The undersigned, the Public Administrator of Amador county, pursuant to the provisions of Section 1736 of the Code of Civil Procedure of the State of California, hereby makes to the Superior Court of Amador county, under his oath, a return of all the estates of decedents which have come into his hands since said last return, the value of each estate, according to the inventory and appraisal thereof, the money which has come into his hands from every such estate, and what has been done with it, and the amount of his fees incurred in each estate, and the balance, if any, in each such estate remaining in his hands

H. E. POTTER,
Public Administrator of Amador county, State of California.

State of California,) ss
County of Amador)
H. E. POTTER, the Public Administrator of Amador county, after being duly sworn, deposes and says:

I was during all the times mentioned in the foregoing statement the duly elected, qualified and acting Public Administrator of Amador county; I have read the foregoing return made on this day by me to the Superior Court of Amador county, and know the contents thereof, and say upon oath that the same is true to the best of my information and belief.

H. E. POTTER,
Public Administrator of Amador county.
Subscribed and sworn to before me this 26th day of November, 1910.
JOHN BLOWER,
Notary Public in and for Amador County, State of California.

Keystone Receiver to Issue Certificates

John H. Isham, who was appointed receiver by the court in the case of the Amador Consolidated Mining Company vs. California Consolidated Mines Co., has filed a petition in the superior court asking for permission to issue receiver's certificates to the amount of \$20,000, bearing interest at the rate of seven per cent per annum, in order to protect the mine and machinery from great damage by the cessation of pumping and other protective work, said certificates to constitute a first lien upon the property of the Keystone mine, at Amador City, except the liens in the action of D. J. Camble and others against the California Consolidated Mines Company. The petition says that the California Mines Company is insolvent, and has been unable to pay its laborers since July, 1910. That the employees who have been engaged in the work of running the pumps to keep the mine free of water, and those employed in repairing shaft, are about to abandon said work, owing to non-payment of wages. The mine is kept free of water by an electric pump which is placed at the 1000 foot level, and which cost \$9700; in case pumping ceases the water would rise to within 500 feet of the surface, and the pump would be almost totally destroyed, and the shaft would close from the 800 to the 500 level. The receiver has no funds with which to pay the employees, and no prospect of getting funds unless the court authorizes the issuance of these certificates.

JACKSON CITY ITEMS

The Methodist church is undergoing alterations that will greatly add to the beauty of the interior of the structure. The walls have received a new coat of plaster, and the ceiling which was angular with the walls, has been reconstructed and given an oval shape, which will add to the effect and help the acoustic qualities.

Bilious? Feel heavy after dinner? Bad taste? Complexion sallow? Liver needs waking up. Doan's regulates cure bilious attacks. 25 cents at any drug store.

Cupid did a rushing business at the county seat on Monday last, when he induced four couples to pledge their troth and obtain the license which would enable them to enjoy the bliss of matrimony.

The Red Front is calling attention to their holiday goods which is now on sale at their flourishing place of business, on Main street, this city.

A new sign was hung in front of the telephone office on court street.

Farmers, mechanics, railroaders, laborers rely on Dr. Thomas' Eclectic Oil. Takes the sting out of cuts, burns or bruises at once. Pain cannot stay where it is used.

Spagnoli's drug store have a new sign, hanging before their place of business on Main street. The work was done by J. Mortimer.

Many school children suffer from constipation, which is often the cause of seeming stupidity at lessons. Chamberlain's stomach and liver tablets are an ideal medicine to give a child, for they are mild and gentle in their effect, and will cure even chronic constipation. Sold by all dealers.

The floor of the macaroni factory building was removed this week, and a new flooring, including, a full set of joists, put in. The old floor has completely rotted from dry rot, caused by lack of ventilation. The new floor has been provided with air to prevent a recurrence of this trouble. The old floor has been in for 25 years, but other floors of the same material and provided with ventilation have been in for twice that length of time, with the joists just as sound as when they were put in.

"Doan's Ointment cured me of eczema that had annoyed me a long time. The cure was permanent." Hon. S. W. Matthews, Commissioner Labor Statistics, Augusta, Me.

CLEANING CHINA AND GLASS.

How to Care For Fine Dishes and Delicate Glassware.

Ordinary everyday china may be washed first in hot soapsuds, then in a clear rinsing water, and dried with soft, clean dish towels. A housekeeper should watch her maid carefully to see if her methods of dishwashing are approved. She should provide her maid with a hand mop, a half dozen good dishcloths, a soapsuds maker—that is, a small receptacle to hold the odds and ends of soap, which, when shaken in the hot water, will create a whole pailful of suds—and two dish-pans, one for washing and one for rinsing. The maid must learn, and she usually does by bitter experience, that to put delicate glassware into scalding hot water means death and destruction to the glassware. The same thing will happen if hot tea is poured into a cold and brittle teacup. This causes sudden expansion, and the piece cracks either under the glaze or quite through it. It is a simple matter either to warm the cups by pouring in a little warm water or by putting them in a warm oven for a moment or, better still, by pouring the tea over a silver spoon resting on the cup.

The heaviest cut glass cracks under a change of temperature. An ice cream dish of this costly ware was once split in half while the mold of ice cream was being helped. Inquiry at the factory disclosed the fact that the sudden fall of temperature, combined with the pressure in cutting the ice cream, had caused the accident. Had the dish been set in the refrigerator a little while before the ice cream had been served it would never have split in half. In washing cut glass, therefore, place it in warm water first before putting it in the hot soapsuds.

When cleansing delicate and costly china strong soaps and soap powders should be avoided. They will surely eat into the gliding and decorations. Either ammonia or borax is safer. In arranging handsome china on the shelves soft mats should be placed between the plates to avoid scratches and nicks. The cups should be hung by their handles from hooks. This is much safer than piling them up on the shelves. Platters should rest lengthwise in a groove on the back of the shelf.

In washing handsome glass and china there should always be an exceedingly soft cloth to be used for a polisher after the piece has been dried with the usual dishcloth. In washing ordinary china it will be found that the hotter the water the easier the pieces are to dry and the shinier they will be.

SUMMER HEADACHE.

How to Relieve It by Use of Fresh Mint Leaves.

Though mint under certain jovial mixtures has been known to give many a summer headache, it is also a cure for it, according to one sufferer. A woman was much troubled with headache that came from heat. She tried many remedies unsuccessfully until an old colored woman told her of a cure much used among southern negroes.

Fresh mint leaves are gathered, crushed into a juicy mass and bound across the head with a handkerchief. Relief quickly follows. This is due, thinks the woman, to the soothing odor of the mint as much as to any healing qualities. Soon after the potion was applied she dropped into a refreshing sleep and usually awoke cured. In very severe cases the woman mixed a little witch hazel with the mint in crushing it.

How to Bake With a Gas Range.

The oven of a gas range is hotter than the old fashioned coal range, which accounts for the difficulty sometimes encountered by beginners in their use in successfully and evenly baking. To obtain the best results for baking loaf cakes, etc., the oven should not be heated more than five minutes before using, but it should be heated five minutes, and when the baking is begun a moderate heat should be maintained. A full realization that the heat in a gas range is direct and certain and easily controlled will bring success to the user. Once you know how long it takes and what degree of heat to cook an article you will never again make a failure if you are careful to watch the time.

How to Darn a Glove Finger.

If you want to mend a glove finger in a hurry and have no special darning handy, use a boy's marble to slip under the hole. These come in different sizes and make a small neat darn easy. Rips should be mended on the outside with a thread as much like that used in stitching as may be. Strive to imitate the seam sewing. Tears in the material may be overcast in tiny stitches on the wrong side, or if they are jagged the edge should be button-holed and the space filled with other rows of the buttonholing. Always use a fine needle in glove mending, as a heavy one weakens the kid.

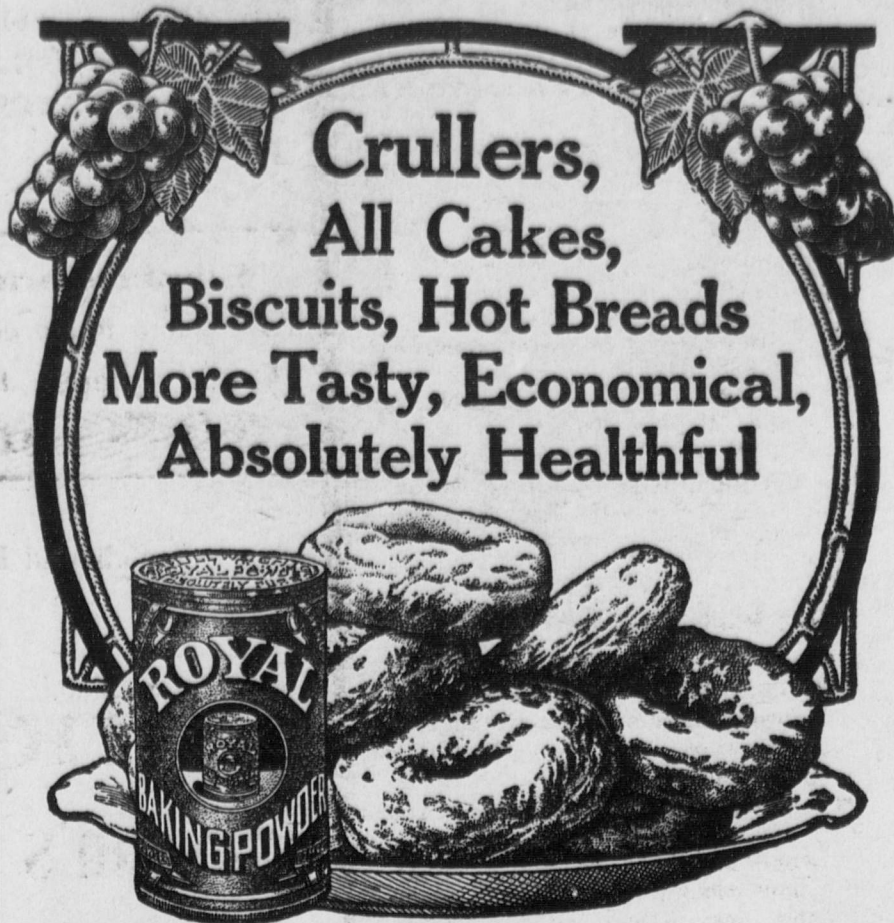

How to Put Cotton in Quilts.

Time and patience may be saved when putting cotton in quilts if the cotton is first rolled about an ordinary yardstick. Spread the cotton out on a large table or on the floor, roll on the stick, then transfer to the quilt foundation and unroll.—Delineator.

How to Thaw Frozen Water Pipes.

When it is not convenient to apply heat to frozen pipes to thaw them, spread a cloth thickly with unsalted lime, fasten it around the frozen pipe and throw water on it. The heat produced as the lime slakes is great enough to thaw the ice.

Royal BAKING POWDER

SUPERIOR COURT.

HON. JUDGE F. V. WOOD

Estate of John Collier.—Continued until December 17.

Estate of H E Morrow.—Continued until December 17.

Estate of Marcus Brown—H E Potter appointed administrator.

People vs John Delucchi.—By consent the passing of sentence and hearing of motion for new trial is continued until December 17.

Estate of Vaso Vucovich—Stella Vucovich petitions for letters. Deceased died in Sutter Creek October 12, 1910, leaving an estate the value of what is not given. Petitioner is the surviving spouse of deceased, and a daughter 13 months old, are the only heirs.

Estate of Julius C Harding—Mary W Harding petitions for letters. Deceased died at the veteran's home in Napa county, November 18, 1910. The estate consists of 113 acres in section 3, township 6, range 12, valued at \$1000, and personal property valued at \$52. The heirs are Irva Florence Harding, daughter, aged 6 years, and petitioner, the surviving wife, both living at Burson, Calaveras county.

Estate of John Mattley—R Beluzzi petitions for letters. Deceased died near Jackson, December 3, 1910, leaving an estate consisting of an undivided one-fourth interest in the ranch of Mattley Bros., of the value of \$2500; also one-fourth interest in stock and other personal property valued at about \$1000. The total value does not exceed \$3600. The heirs are Mary Mattley, wife, and David Mattley, aged 20, living in San Francisco, and Roy Mattley, aged 10 years, living in Jackson. The petitioner is the nominee of the widow.

Nick Marinovich vs Peter Derania—Suit to recover damages in the sum of \$2000 for personal injuries inflicted by defendant upon plaintiff, also for \$40 medical attendance, \$30 hotel bill, \$10 for nurse, and \$250 for 125 days for hired man on the ranch, and for costs. The complaint recites that on the 29th of July, 1910, at Plymouth in this county, defendant, without cause, violently assaulted plaintiff, beating him into insensibility, striking him in the face with metal knuckles, smashing his nose; that while plaintiff lay on the ground, defendant kicked him on the body breaking one rib, and displacing four other ribs, also injuring the liver; the fractured rib punctured one lung of plaintiff, causing the air to escape through the puncture. That thereby the face, neck and chest, and

upper part of the body became swollen to abnormal size. He was kept to his bed for 59 days, and has since been unable to attend to his own business, and is now a cripple for life. F A Orr is attorney for plaintiff.

Estate of J. B. Francis—J. M. Francis petitions for letters of administration. Dec. 24 set for hearing.

When a cold becomes settled in the system, it will take several days' treatment to cure it, and the best remedy to use is Chamberlain's cough remedy. It will cure quicker than any other, and also leaves the system in a natural and healthy condition. Sold by all dealers.

What He Saved.

"Good!" shouted the friend of the bibliophile as the latter emerged from the burning house carrying a bundle of books. "Did you save your Shakespeares?"

"No," replied the bibliophile, combing a spark out of his whiskers; "I saved my Bacon."—Houston Post.

Timely Warning.

Proprietor—I am satisfied with your work, Pusher, and I will raise your salary from \$10 to \$12 a week; but, mind, that does not mean that you must go and get married on the strength of it.—New York Times.

A Dozen Eggs.

The Teacher—How many eggs are there in a dozen? The Pupil—Five fresh ones, five doubtful ones and two bad ones.—Cleveland Leader.

Not Sorry For Blunder

"If my friends hadn't blundered in thinking I was doomed victim of consumption, I might not be alive now," writes D. T. Sanderson, of Harrodsburg, Ky., "but for years they saw every attempt to cure a lung-racking cough fail. At last I tried Dr. King's New Discovery. The effect was wonderful. It soon stopped the cough and I am now in better health than I have been for years. This wonderful life-saver is an unrivaled remedy for coughs, colds, lagrippe, asthma, croup, hemorrhages, whooping cough or weak lungs. 50c, \$1.00. Trial bottle free. Guaranteed by Spagnoli's drug store.

Better Photographs

When you have your "photos" taken by LOGAN you get better workmanship and more satisfaction than anywhere else. Up-to-date apparatus, the best of skill and many years of experience have given LOGAN a well deserved reputation. He is the premier photographer of Stockton. When you come to town don't fail to call at the studio—15 S. San Joaquin St. Prices always reasonable—work always best

MURDER CASE IS BEING TRIED

Continued from Page 1

death next morning about half-past eight.

During the fight in the kitchen, George Sampo struck witness's mother with a chair. He broke the glasses. Her mother sent for the deputy constable Dan Bona. Did not know whether the constable came at the request of her mother, or at the instance of George Sampo.

Saw George Sampo at the preliminary examination a week afterward; he had a black eye then. I do not know how he came by it. Never saw any one strike him while in the house on the 19th. Was friendly with all the parties; knew them to be good boys.

When court convened at 9:30 this (Friday) morning, Mrs Callandra was called as a witness, and testified that she was a resident of Drytown. Her home was on Spanish street. Shortly after 10 o'clock on the night of November 19, which was a bright moonlight night, she heard noises in the street. She was in bed at the time, and got up and went out on the porch; saw three men across the street about 50 feet away; recognized one as the defendant, Giacomo Sampo, and another as the deceased, Pistoni; the other was a short man whom she did not recognize. Heard Pistoni hollering: "Please, let me alone, I have nothing with you; don't kill me; let me alone, please." This was repeated twice by deceased. They were in a bunch together. Saw no blow struck. Heard Sampo, defendant, answer back in Italian, that he was going to kill him (deceased). Told her husband to go out to where the trouble was, and witness went into the house because her child had started to cry. Next morning she went to the point in the street where she had seen the men, and picked up a rock—the only large one thereabouts. It was as big as two fists. Picked it up in the presence of her husband and brother-in-law, and handed it to the latter. Sheriff Gregory afterwards put a mark on it in her presence. The rock was produced and identified by the witness.

The case is in progress as we go to press.

Mrs McMillan Married

The Oroville Register of a recent date gives the following account of the marriage of Mrs McMillan, a former resident of Jackson, who left here for her present home about nine years ago. Her then husband, McMillan, a photographer, formerly of the local gallery, died there a few years back:

T J Finney, a well-known business man of St Paul, and Mrs Alice McMillan, of Thermalito, were married yesterday afternoon at the Congregational parsonage. The ceremony was performed by Rev. R D Douglass.

Mrs Finney has a host of friends in Oroville and Thermalito, who will extend to her their most sincere wishes for a happy and prosperous life. Her home at Thermal Heights, in Thermalito, is one of the most famous places in this portion of the state. For the past few years she has taken entire charge of the place, and now has growing there plants and trees from almost every country in the world. When the "Newspaper Special of the Western Pacific" was in Oroville a representative of the Scripps chain of newspapers, extending from the Atlantic to the Pacific Ocean, was sent to interview here. Following his visit, articles descriptive of her place and the work that she had done have appeared in practically every newspaper controlled by the Scripps interests. As a result Thermal Heights has become famous the country over as showing what a woman can do on a five-acre ranch.

The groom is a well-known business man in St. Paul. In addition to his large business interests there, he also has a large acreage in vineyards in the southern part of the state.

Following a honeymoon which will be spent in various points of interest the state over, Mr and Mrs Finney will return to Butte county, and will make their home in Thermalito.

A reception was tendered the happy pair by their many friends at their Thermalito home.

Bull Baiting.

Although bull baiting was a cruel pastime, it was also a fulfilling of the law, for formerly no butcher was allowed to offer for sale the flesh of any bull that had not been baited. The goading of the animal in a fury was supposed to have some influence on the flesh. In a similar belief the flesh of a hunted hare was thought to be superior in flavor to that of one that had been shot, and a present of "a hunted hare" was considered to be a special compliment. In the records of the corporation of Leicester, England, the following order appears: "At a common hall, held on Thursday before St. Simon and St. Jude, 1467, 'no butcher to kill a bull till baited.'" At Winchester it was ordered (reign of Henry VIII.) "that from henceforth there shall be no bulstake set before any mayor's dore to bayte any bull, but onlie at the bull-ringe within the saide citie."

The Fountain Head of Life Is The Stomach

A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improperly and insufficiently nourished.

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgement.

This "Discovery" is a pure, glyceric extract of American medical roots, absolutely free from alcohol and all injurious, habit-forming drugs. All its ingredients are printed on its wrappers. It has no relationship with secret nostrums. Its every ingredient is endorsed by the leaders in all the schools of medicine. Don't accept a secret nostrum as a substitute for this time-proven remedy of known composition. Ask your neighbors. They must know of many cures made by it during past 40 years, right in your own neighborhood. World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N. Y.

California's Great Increase

The population of the state of California is 2,377,549 according to statistics of the thirteenth census made public to-day.

This is an increase of 892,496, or 60.1 per cent over 1,445,053 in 1900.

The increase from 1800 to 1900 was 276,923, or 22.9 per cent.

Population by Counties

It is stated that under the present apportionment this increase in population will give California four new congressmen.

Deafness Can not be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars or any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c. Hall's Family Pills are the best

Made Trip Over Summit

On Tuesday evening Walter L. Butts reached Placerville upon his return trip over the summit of the Sierra by way of the Placerville and Lake Tahoe state highway. He left this city early last week for the purpose of going to Lake Valley to look after some stock which has been left for other parties to take care of and drive out into Nevada for the winter. Mr Butts found little snow in going over the range, but upon his return found it two and a half feet in depth on the level for several miles near the Summit. On the trip he visited Tallac, The Grove, Al-Tahoe, Glenn Alpine and other well known pleasure resorts but all are closed for the winter, with only keepers in charge. At Glen Alpine, where Mr Butts went to look after some horses, he found that the parties who had been entrusted with getting them out had left a fine young mare to her fate she having gone lame and could not travel. The animal had starved almost to death, and it was found necessary to kill her as she was too weak to get out and there was absolutely nothing left for her to subsist upon.—Nugget.

Children Cry FOR FLETCHER'S CASTORIA

Pioneer Laid to Rest

Another of our old pioneers passed away near Lancha Plana, Amador county, Saturday, December 3. George W. Coats was born in Ray county, Missouri in 1840 and came overland to California in 1860. He was married to Miss Sarah V. Wickham of Wallace in 1878, who survives him also five children and two grandchildren, Mrs R. N. Clark of Lancha Plana, Charles and Herbert Clark of Lancha Plana, Frank Coats of Wallace and Gordon Coats of Camanche. Mr Coats accidentally shot the thumb off his right hand the first year he was in California; forty-eight years afterward it began to bother him and finally turned into a cancer from which he suffered terribly the past two years. He had his arm taken off about one year ago in an effort to save his life, but the relief was only temporary the cancer broke out again in about two months under the arm pit and eventually causing his death. Mr Coats was a man of sterling qualities. Honesty being his watch word. While he suffered terribly he was very patient with all. He told the writer when he went to Stockton to have his arm taken off, that he did not expect to come back alive, but was ready to go if God was willing it should be so. Rev. Mr Thatcher of Valley Spring preached the funeral service.—Prospect.

Saved from Awful Death

How an appalling calamity in his family was prevented is told by A. D. McDonald, of Fayetteville, N. C. R. F. D. No. 8. "My sister had consumption," he writes, "she was very thin and pale, had no appetite and seemed to grow weaker every day, as all remedies failed, till Dr. King's New Discovery was tried, and so completely cured her, that she has not been troubled with a cough since. Its the best medicine I ever saw or heard of." For coughs, colds, la grippe, asthma, croup, hemorrhage—all bronchial troubles, it has no equal, 50c, \$1.00. Trial bottle free. Guaranteed by Spagnoli's drug store.

Vote on Court House

After an opportunity for all interested parties to be heard, the board of supervisors of El Dorado county have decided on a site upon which the new court house will be erected. By a vote of three to two it was decided that the old site occupied by the county's business house before the fire of last May was the most desirable and fitting location for the new building soon to be erected. Supervisors Smith, Heuser and Diehl were of this opinion, and so voted, while supervisors Hughes and Jones were of the opinion that Uppertown or some other location was preferable.—Nugget.

End's Winter's Troubles

To many, winter is a season of trouble. The frost bitten toes and fingers, chapped hands and lips, chilblains, cold sores, red and rough skin, prove this. But such troubles fly before Bucklen's Arnica salve. A trial convinces. Greatest healer of burns, boils, piles, cuts, sores, eczema and sprains. Only 25c at Spagnoli's drug store.

To Settle Estate

Estate of Earl Herbert Liversedge—Sophie Liversedge petitions for letters of administration. Deceased died on the 20th day of October, 1910. The heirs at law are petitioner, the surviving wife of deceased, and Ralph Liversedge, son, aged 17 months, both residing at Pine Grove, in this county. The value of the estate is uncertain and no estimate is given.

It is light in weight (only 20 lbs) runs extremely easy and can be operated perfectly and easily by one person. With ordinary care the "Simplex" will last a lifetime.

Dealers and Agents Wanted to sell both our hand and electric machines. Electric Cleaner Co. 98 Jackson Boul. CHICAGO, ILL.

Object to Smoke

Posters are out this week calling a meeting of those interested in the copper smoke problem for Saturday, December 7th at 11 a. m. sharp, at Wallace. The meeting will be called promptly on time as several expect to come from a distance and it is the intention of the committee to make a complete report of progress made and of what information they have gathered, not only what can be done to eliminate the smoke nuisance but what is being done in other places. It is very necessary for all those interested either way to be present, and if possible make their wants known or else for ever after hold their peace. A great many have found fault with the committee because as they say there has been nothing accomplished. If you attend this meeting you will find out what the committee has done, what they think can be done, and a majority can decide what shall be done to do away with the copper smoke nuisance.—Prospect.

Banks on Sure Thing Now

"I'll never be without Dr. King's New Life Pills again," writes A. Schingeeck, 647 Elm St., Buffalo, N. Y. "They cured me of chronic constipation when all others failed." Unequalled for biliousness, jaundice, indigestion, headache, chills, malaria and debility. 25c at Spagnoli's drug store.

Ranch for Rent

FOR RENT.—Stock ranch near Drytown, 305 acres fenced in three fields. Plenty of water, house and two barns. Also have for sale, two horses, harness, plows and four horse team. Inquire of Clemente Giannini, Drytown or directly of owner, Mrs. John Giannini, 465a Frederick Street, San Francisco. No.4

Fruit Raising Profitable

El Dorado county shipped during the past season 247 carloads of assorted fruits. Reckoning an average value of \$500 per carload, that means an income of \$123,500 from this source. Of course this is not net profit, but there is no doubt a fair margin of profit is left after defraying all expenses. Amador county is just as well, if not better, adapted for fruit growing as El Dorado, and could with a little energy in this direction be made to show up equally well. True, transportation facilities may be somewhat better in El Dorado than in this county.

Notice to Creditors

Estate of John B. Batchelder deceased.

NOTICE is hereby given by the undersigned, Administrator of the estate of John B. Batchelder, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them, with the necessary vouchers, within four months after the first publication of this notice to the said administrator at the law office of Wm. G. Snyder, at Jackson, Amador County, California, the same being the place selected for the transaction of the business of said estate, in said Amador county.

Dated December 9th 1910. J. E. BATCHELDER, Administrator of the estate of said deceased. Wm. G. Snyder, Attorney for said Administrator.

Order to Show Cause Why Order Of Sale of Real Estate Should Not be Made.

In the superior court of the county of Amador, state of California.

In the matter of the persons and estates of Elvie H. Troyan, Hilda J. Troyan, and John G. H. Troyan, minors.

It appearing to this court from the petition this day presented and filed by Amanda Emma Troyan, the guardian of the persons and estates of, Elvie H. Troyan, Hilda J. Troyan, and John G. H. Troyan, minors, praying for an order of sale of certain real estate belonging to said wards, and that it is for the best interests of said wards, and necessary that such real estate should be sold;

It is hereby ordered that the next of kin of said wards, and all persons interested in the said estate, appear before this court on Saturday, the 12th day of November, 1910, at 10 o'clock a. m., at the court room of this court, in the city of Jackson, county of Amador, state of California, then and there to show cause why an order should not be granted for the sale of such estate.

And it is further ordered that a copy of this order be published at least once a week for three successive weeks before the day of hearing, in the Amador Ledger, a newspaper printed and published in said county of Amador. Dated October 11, 1910. FRED V WOOD, Judge

THE CENSUS

Continental America Has 91,972,266 Inhabitants

Washington, D. C., Dec. 10.—The census of continental United States is 91,972,266. This is an increase of 15,977,691, or 21 per cent. The increase of population, including the territories and dependencies is 16,145,521.

The census by states and territories was completed to-day, and the result is most gratifying. It comes within a few thousand of the predictions made by the officials of the census bureau several weeks ago. The complete census, including dependencies and territorial possessions, is 93,402,151.

The census of the state of Washington is 1,141,990. This is an increase of 623,887, or 124 per cent. Washington, with the increase, is entitled to three new congressmen.

The population of Wisconsin is 2,333,860, and that of Georgia 2,609,121. This is an increase of 17 per cent for Georgia and 12 per cent for Wisconsin. Each state is entitled to a new congressman.

The census of Alaska is 64,356, an increase of 764. The Montana census is 376,053, an increase of 132,724, or 54 per cent. Taking the census of the Philippines as it stood in 1903, which was 7,635,426, and adding the population of Guam, Samoa, the canal zone, and there is a grand total population of 100,000,000. The United States with specified dependencies is meant by the census bureau to include the United States, Alaska, Hawaii, Porto Rico and the military and naval population living abroad. It does not include other possessions.

The New York census stands corrected at 9,113,614. This is an increase of 25 per cent and means nine new congressmen. The states rank as follows in the census:

New York, Pennsylvania, Illinois, Ohio, Texas, Massachusetts, Missouri, Michigan, Indiana, Georgia, New Jersey, California, Wisconsin, Kentucky, Iowa, North Carolina, Tennessee, Alabama, Minnesota, Virginia, Mississippi, Kansas, Oklahoma, Louisiana, Arkansas, South Carolina, Maryland West Virginia, Nebraska, Washington, Porto Rico, Connecticut, Colorado, Florida, Maine, Oregon, South Dakota, North Dakota, Rhode Island, New Hampshire, Montana, Utah Vermont, District of Columbia, New Mexico, Idaho, Arizona, Delaware, Hawaii, Wyoming, Nevada, Alaska.

Christmas Decorations

A number of carloads of red berries have been shipped to the cities from this section recently to meet the Christmas demand. The trade is a profitable one, as the cost entailed is nothing more than labor and freight charges, and sometimes a small charge by the owners of the land for the privilege of gathering the berries.

We desire to call the attention of blacksmiths and other workers in iron to the fact that we keep constantly on hand a large and complete stock of bar, round and Norway iron, gas pipe, gas fittings, etc., which we sell at the LOWEST CASH PRICES.

Comedy Drama

Makes a Hit

The "Girl of the Hour," introduced to a large audience last Friday evening in Love's hall, for the benefit of the Woman's Improvement club of Jackson, by local talent, proved a big financial success. Over two hundred and fifty dollars worth of tickets were disposed of, and after the expenses were all paid, the club and the director of the play, a former professional actor named Graham, each received one hundred and eight dollars.

The play itself was too trivial to be called good. It was the remains of a much mutilated and revised comedy drama, with a few of the heavy parts omitted.

Several of the performers, however, acquitted themselves in a very admirable manner.

Mrs W. J. Nettle jr., who impersonated the character of an old maid, named Miss Chadwick, was the star attraction. Her costume, together with the manner in which she conducted her part, was side splitting with laughter. Men, women and children fairly screamed with mirth as the old maid who sat down besides Ernest Spagnoli, who assumed the role of Mr Shaketon, a young sport filled with blue blood, who in his despair for a woman whom he could have to represent as his wife, he proposed to the quaint old damsel, and was immediately accepted. Roar after roar of laughter went up as the two sat on the sofa embracing each other.

The young man's urgent need of a wife was because he had already informed the guardian of his estate, that he had been married, as a provision in his father's will stipulated such a requirement of him. As a matter of fact, he had never become a benedict, and his guardian had in-

formed him by a messenger that he intended to call and meet Mrs Shaketon that same day. Finally turning to the over zealous maiden of many summers, he added, "Remember this marriage is only to be a temporary one," "Sir," shrieked the astonished female, fairly bounding off the sofa, "how dare you insult a maiden by such a proposal. I can see right now that no young girl's honor is safe in your company," and with a few cutting remarks to show her contempt for the audacious youth she stepped behind the curtains.

Those in the audience certainly had good cause to laugh, the part could not have been more ludicrously or amusingly performed by professional talent.

Miss Hilda Sanguinetti, who made her debut before the footlights in the show recently played here, entitled "The Honor of a Cowboy," had the leading part as the "Girl of the Hour," and played her part very creditably. She had a complicated and lengthy role to perform, which she carried throughout in a praiseworthy and satisfactory manner.

Roy. B. Skelly handled his role very nicely. It was his good fortune to marry the girl of the hour, in the first act, which in turn of course gave him the privilege of showering his affection on the popular and conspicuous young maiden.

Alphonse Bergin, Wm. M. Penry, Madge Sanguinetti and Inez Tam each in a very satisfactory manner acted their parts of the play, and received their portion of applause.

If you are suffering from biliousness, constipation, indigestion, chronic headache, invest one cent in a postal card, send to Chamberlain Medicine Co., Des Moines, Iowa, with your name and address on the back, and they will forward you a free sample of Chamberlain's stomach and liver tablets. Sold by all dealers.

Improving Nicely

The condition of Mrs Nick Mattis who underwent an operation for an abscess of the appendix last Tuesday in the county hospital, is very encouraging, and a speedy recovery is anticipated. Drs. Endicott and Gall performed the operation which was deemed necessary to save the life of the patient who had suffered considerable pain from her affliction.

Mrs Dipple Dies.

A dispatch from Marysville to the Sacramento Bee, dated December 13, says:

Mrs J. R. Foster of this city has received word that her mother, Mrs Phillip Dipple, died in Berkeley yesterday. Decedent was a pioneer resident, coming to the state in 1851, being in Sacramento during the fire and flood of 1852, and settling in Lincoln in 1853, residing there until recently. She was a native of Prussia, and 80 years of age. She is survived by five daughters and one son.—Bee.

Deceased was the mother of Mrs Sadie Kay, for many years a resident of Jackson, and who left here only a few weeks ago.

AUKUM

On the 22d of October, last, at 11:55 o'clock at night, we were sitting in the waiting room of the Southern Pacific depot, at Sacramento, waiting to take the train for Truckee. Train after train had stood on the track in front of the depot, and as time swept by they each went east or south as their destination called them. We

had grown tired awaiting our train to take us to our destination. I was half asleep when the train announcer cried out in clear ringing voice, "This train goes to Roseville, Auburn, Colfax, Truckee, Reno and Wadsworth." As the announcement died on his lips, I sprang to my feet and taking my grip in my hands was soon seated in the car, reclining at ease upon a cushion seat and awaited the action of the train to take me on my way to my destination. We had barely got out of the city lights when the Pullman car conductor was asked for a berth. "Sorry, he said, "but they are all occupied." But one choice was left us—shut ourself up like a jack-knife and go to sleep upon the seat. As I again took my seat, I glanced over the car at the occupants who were making a fruitless effort to induce morpheus to take them on to slumberland. A couple of women sat on the opposite side of the car and from their peculiar broken English, I took to be Swedes. One had two infant children; one little girl stood upon her feet, her head and hands buried in her mother's lap, her long golden tresses falling in confusion down by her mother's side. The other, a mere babe, lay in perfect composure fast asleep in dreamland, upon its mother's breast. In the next seat in front of me a Jew was sleeping, his head resting upon a pillow he had thoughtfully brought along. The man was perhaps not yet in his majority. He was sleeping with that death-like composure only seen in sleeping babes. As I looked at him, his clean cut classic face, white as alabaster, and in death-like quietude, I almost envied him his slumber. As the train sped along, shadows flitted in effigy, as if playing a trick upon our half sleeping imaginery of our senses. Occasionally a light from a farm house window stood like a star in the

black ground of night that surrounded it. We had passed place after place, I had gone into a momentary slumber when all of a sudden a brakeman's voice shouted, "The next station is Colfax." This place was named in honor of Schuyler Colfax, who was vice president of the United States at the time it received its name. Here the narrow gage railroad takes you on, if you like, to Grass Valley and Nevada. When daylight broke we were crossing the grey, ragged range of the Sierra Nevada mountains. From Blue Canyon almost to Truckee on the east side of the mountains, the road-bed is housed in by what are known as the "snow sheds." Here and there only the sides are left open, giving one a chance to catch a glimpse like view of the bold bare mountains I have just mentioned. Squatting at the base of this huge ragged range in the famous Donner lake. Nestling in the shadows of twilight it lifts itself in shadowy shape before you. Here in 1846 an emigrant train was caught in a snowstorm and many perished from starvation. Only a half decade of years since a few hundred dollars in silver was picked up around the place where the ill-fated emigrants perished. Three miles and a half on toward the Nevada line is the town of Truckee, once named Coburn station. It is a place of about 1500 inhabitants. Unpretentious in mold with no gaudy structures lifting their heads before you, it stands as a typical town of by-gone days. In one respect, it bears the palm of all other places; having in

its environs 38 saloons. This, I was told by a saloon keeper himself. Thus making a saloon for every 39 1/4 persons less a fraction over. Here too, lives the author of the Donner party, Charles F. McGlashan, now a lawyer of that place. Many years ago he taught school in Amador county. Two sisters also taught here and were very talented women. McGlashan has marked himself up to the Rooseveltian doctrine, "raise a big family," for I was told he has eight living children, one of which, a girl, was admitted to the bar and qualified to plead before all the courts of the state. For a time their advertisement read, "McGlashan & McGlashan lawyers." She was said to be a very talented woman, but for all that the law waned, when medicine came in view, for she married a rich doctor. Since then upon the "shingle" simply reads, Charles F. McGlashan, lawyer.

CHAS. S. BELL.

Wants to Help Someone.

For thirty years J. F. Boyer, of Fertile, Mo., needed help and couldn't find it. That's why he wants to help some one now. Suffering so long himself he feels for all distress from backache, nervousness, loss of appetite, lassitude and kidney disorders. He shows that electric bitters works wonders for such troubles. "Five bottles," he writes, "wholly cured me and now I am well and hearty." It's also positively guaranteed for liver trouble, dyspepsia, blood disorders, female complaints and malaria. Try them. 50c at Spagnoli's drug store.
